

## **RoHS 3 Compliance Certificate**

RoHS stands for Restriction of Hazardous Substances, and impacts the entire electronics industry and many electrical products as well.

The original RoHS, also known as Directive 2002/95/EC, originated in the European Union in 2002 and restricts the use of six hazardous materials found in electrical and electronic products.

Directive 2011/65/EU was published in 2011 by the EU, which is known as RoHS-Recast or RoHS 2. RoHS 2 includes a CE-marking directive, with RoHS compliance now being required for CE marking of products. RoHS 2 also added Categories 8 and 9, and has additional compliance recordkeeping requirements.

Directive 2015/863 is known as RoHS 3. RoHS 3 adds four additional restricted substances (phthalates) to the list of six.

EU RoHS specifies maximum levels for the following 10 restricted substances:

- heavy metals and heavy metal compounds of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr VI),
- flame retardants based on polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE)
- phthalates (DEHP, BBP, DBP and DIBP).

This statement certifies that products of Central Midori Int'l Pte Ltd do not contain substances listed above in excess of the Maximum Concentration Value (MCV) as outlined in the directive RoHS 2015/863/EU. The information is provided to the best of our knowledge and is based on supplier certifications.
